Asset Labels. Designed to meet your requirements.

They can be a 2 or 3 colour print with or with out Sequential numbering and Bar-coding.

These are highly flexible security labels produced from self adhesive white ultra destruct vinyl material. Any attempt to remove will result in the material fragmenting **thus asset cannot be substituted and authentication of products is** preserved. These labels are produced using the highest quality materials and print processes with exact matching of corporate colours.

IMPORTANT – our labels satisfy both an **ASSET** and **SECURITY** function. They are made of fine tamper-resistant material with a high-tack adhesive which attaches firmly to the dimpled finish found on office equipment. **They cannot be removed intact** and cannot be moved to other equipment. Once attached they require a period of 6 hours for the adhesive to fully cure.

The Pennine Acute Hospital Labels.

All styles of asset labels can be designed and supplied.

Labels can be produced in any size, shape or colours.

Sequential number ranges with prefixes or suffixes.

Any recognised Barcode Symbology (Type 128 used as standard)

Durable varnished finish Type 'C' Ultra-destructible vinyl

Also Available Foil Laminated These Asset Labels employ a permanent acrylic adhesive. The finish is a "metallised" high gloss, very grime resistant and could be considered for applications where appearance is especially important although, by nature of the material, they can be removed intact.
