PROJECTOR SECURITY SOLUTIONS - CABLE BASED

Cable based security solutions for your overhead projector provides an excellent cost effective alternative to cages. The main advantages of using cables and anchor points are as follows:-

- 1 **An excellent anti theft deterrent**
- 2 **Quick and simple to install**
- 3 **No restriction to accessing the projector or to its functionality**
- 4 **Much more cost effective**

STEEL CABLE

We recommend a 9mm diameter cable all sizes are available. The cable has a twisted steel core and is plastic coated. One end is a stop end and the other slots into a 50mm steel laminated shackle less padlock.

CEILING/POLE ANCHOR POINTS

Simply remove the M8 nut from the bolt that secures the pole to the ceiling mounting and replace with the screw on lug as seen in the picture. Once the cable is passed through the lug it cannot be removed. We also provide a coach bolt if you want to replace the existing bolt.

This picture shows an Anchor point secured to the ceiling. The heads are then covered by a plate to prevent their removal. The cable is then past through the anchor and a loop formed using the loop generator

A very effective way and fast way of creating a anchor point is to secure the cable to the pole with a **U-bolt**.

The U-bolt nuts are protected by a plate secured in place by the security cable.

PROJECTOR ANCHOR POINTS

A scissor hasp is inserted into the Kensington slot on the projector. The cable is then passed through and locked using a Shackle less padlock.

The two screw-on lugs are secured to the projector using the screws provided. These will then secure the projector to the mounting plate and once the cable is passed through the lugs there is no access to the screws. A 50mm Shackle less padlock then prevents removal of the cable.

KITS ONE PRO 1 consists of :-	KIT TWO PRO 2 consists of :-
1 x 9mm diameter 1.5m long steel cable. One stop end, one end to be inserted into the shackle – less padlock 1 x Screw on lug to fit on the bolt at the top of the pole 2 x Screw on Lugs to screw onto projector with required screws 1 x 50mm steel laminated Shackle less padlock with two keys.
